HOSPITALFIELD

Pamphlet Series

AUTUMN RESIDENCY 2015

DON'T THINK I KNOW WHAT YOU'VE DONE

I stop filming for a second
to take a photo of a ride
called UFO

and take a selfie of myself
next to the snack bar

with apocalypse dogs

HOLLY WHITE

with ships that were out of service and sections in general turning passengers to the southside of new zealand, and in return for dropping off these immigrants he would come back with plants which was very typical of that period, and he brought back tree ferns, he knew patrick allen fraiser and he gave him three tree ferns, [00:05:25.05][00:05:25.05] and there is original evident in the library to prove that he built the fernery for that purpose

for just those three ferns?

[00:05:32.02][00:05:32.02] and this was the height of fashion in the victorian period, because it was called teretodomania, and that was coined by the man who wrote the water baby, charles kingsley, and it was a fashion thing that had got created, and once the victorians got hooked onto something like that, and as a result sadly a lot of ferns that we had growing indigenous to great britain were almost eradicated because everybody was collecting ferns, and it was called the fern craze

and what was the word you used?

[00:20:42.12][00:20:42.12] swarming is how bees split up, so that was how they multiply and spread

[00:20:56.04][00:20:56.04] so they do that very rapidly do they, over

[00:20:57.09][00:20:57.09] yes

yes

and as a beekeeper it is good to stop bees swarming because people get cross,

because you see them and they all come out?

[00:21:13.09][00:21:13.10] well if it's really really bad they'll go into someone's chimney, and they'll go into someones bedroom and people have had to go and say i'm so so sorry and the persons wardrobe and clothes are just full of them.

[00:22:14.11][00:22:14.12] yes so if you've got a swarm and it's just swarmed and it's eaten, you can just take a bare hand and push it in, and they're very calm, but as the days goes on they put out scouts and whne the scouts have spotted somewhere good they'll speak and they'll say that's the best one, no that's the best one until it has been agreed that that's where they'll go, if you have a swarm that has to stay out gets cold and wet it can get quite cross.

they're so clever aren't they, they're amazing.
